

EDUCATION

- **Virginia Polytechnic Institute and State University** 2023 – Expected 2027
Ph.D. in Economics (Ag) Blacksburg, VA
- **Seoul National University** 2017 – 2019
M.S. in Agriculture Republic of Korea
- **Kyung Hee University** 2009 – 2014
B.A. in International Studies Republic of Korea

RESEARCH INTERESTS

Agricultural Trade and Policy; Food and Consumer Economics; Applied Microeconometrics and Machine Learning

WORKING PAPERS

- **From Price Pass-Through to Consumer Welfare in the U.S. Fresh Tomato Market under the Tomato Suspension Agreement (TSA)** [*Job Market Paper*]
 - This paper examines how upstream price shocks are transmitted through the U.S. fresh tomato supply chain and ultimately affect consumers. Using high-frequency shipping-point, wholesale, and retail price data, I estimate dynamic pass-through across successive market stages with an instrumental-variables distributed-lag framework and find that price shocks are only partially transmitted as they move downstream. I then combine these estimates with a household demand system to evaluate the consumer incidence of the tariff associated with the termination of the Tomato Suspension Agreement, linking supply-chain price transmission to changes in retail prices and household welfare across income groups.
- **Food Price Inflation and Welfare Effects across Food-at-Home and Food-Away-from-Home Consumption**
 - This paper examines how food price inflation affects household consumption and welfare across Food-at-Home (FAH) and Food-Away-from-Home (FAFH) consumption. Using Consumer Expenditure Survey data, I construct income-group-specific Distributional Consumer Price Indices (D-CPI) and incorporate them into an Exact Affine Stone Index demand system to account for heterogeneity in both expenditure patterns and inflation exposure. The analysis evaluates how conventional aggregate price indices may mask distributional differences in the incidence of food inflation, with particular attention to changes in consumption responses and welfare across income groups during major inflationary episodes.
- **The Impact of the Seafood Import Monitoring Program (SIMP) on U.S. Seafood Trade**
 - This paper examines how the Seafood Import Monitoring Program (SIMP), a U.S. traceability regulation targeting illegal, unreported, and unregulated (IUU) fishing, affected U.S. seafood imports from 2015 to 2024. Using a structural gravity framework with staggered difference-in-differences estimation via PPML, the analysis finds reductions in import value and quantity and increases in unit prices, with substantial heterogeneity across exporters and products associated with IUU risk and U.S. market power. As a complementary heterogeneity analysis, the paper applies an XGBoost classification model to identify exporter-product relationships most vulnerable to large post-SIMP trade contractions and uses SHAP values to assess the relative importance of pre-treatment characteristics in predicting these disruptions.

WORK EXPERIENCE

- **Korea Rural Economic Institute (KREI)** Republic of Korea
Researcher 2020 – 2023
 - Evaluated the impact of trade agreement participation on the Korean agricultural sector
 - Contributed to OECD policy discussions (CoAG, APM, JWPAT, JWPAE) and supported the development of Korea's agricultural policy strategy
 - Analyzed policy responses to enhance grain self-sufficiency and strategic stockpiling following Russia's invasion of Ukraine
- **Institutes of Green Bio Science and Technology, Seoul National University** Republic of Korea
Junior Researcher 2019 – 2020
 - Conducted feasibility and policy research for international development projects funded by the IDB and KOICA across Uruguay and Southeast Asia
 - Designed household surveys and analyzed agricultural information systems and market-access interventions for smallholder farmers in Laos, Thailand, and Myanmar
- **E-SAAN Center for Business and Economic Research (ECBER), Khon Kaen University** Thailand
Field Research Assistant Jul. 2017 – Aug. 2017
 - Conducted field surveys across 58 villages in Kalasin District, Northeast Thailand, for a royally funded behavioral economics project on crop diversification and farm income improvement
 - Trained and supervised enumerators; performed data cleaning
- **Institutes of Green Bio Science and Technology, Seoul National University** Republic of Korea
Young Professional (KOICA-funded Research Intern) Sept. 2016 – Feb. 2017
 - Provided administrative support for a joint Laos-Thailand research project and participated in survey design
 - Participated in survey design for a poultry farming income-improvement project in Tanzania
- **United Nations Foundation** Seoul
Research Intern Mar. 2011 – Jul. 2011
 - Supported headquarters operations for an anti-malaria bed net distribution campaign in Africa
 - Assisted with campaign planning and liaised with headquarters staff in Washington, DC

TEACHING EXPERIENCE

- **AAEA Teaching Academy** 2026 – Present
Participant
 - Selected to participate in AAEA's professional development program focused on teaching innovation in agricultural and applied economics
- **Virginia Tech, Dept. of Agricultural and Applied Economics** Blacksburg, VA
Graduate Teaching Assistant
 - **AAEC 3024: Monetary and Global Issues in Applied Economics** (Spring 2025; Spring 2026)
 - Facilitated weekly review and exam-preparation sessions to consolidate core concepts
 - Provided written feedback on assignments and led assignment review sessions
 - Held regular office hours; supported student learning through one-on-one consultations
 - Assisted with grading of assignments and examinations
- **Seoul National University, Graduate School of International Agricultural Technology** Republic of Korea
Graduate Teaching Assistant

- **Methods and Applications in Economic Research** (Sept. 2017 – Feb. 2018)
Led data analysis sessions on quantitative research methods
- **International Agricultural and Forest Policy Analysis** (Sept. 2018 – Feb. 2019); **Forest and Environmental Policy in the DPRK** (Mar. 2018 – Aug. 2018)
Graded assignments and examinations; assisted with general course administration

HONORS AND AWARDS

- **Excellent Researcher of KREI 2022** *December, 2022*
Korea Rural Economics Institute
 - One of KREI's department-level Excellent Researcher awardees for 2022
- **Excellent Research Award** *March 2021*
Korea Rural Economics Institute
 - Ranked 3rd out of the institute's full annual research portfolio
 - Preliminary Basic Research to Change the Market Price Support (MPS) Calculation Method of the Republic of Korea
- **Excellent Research Award** *June, 2018*
Korea Agricultural Economics Association
 - 2nd place, graduate student paper competition
 - Impact of Information Accessibility on Smallholder Farmers' Income and Productivity: The Case of Lao PDR

SKILLS

- **Programming Languages:** STATA, R, Python, MATLAB
- **GTAP:** Intermediate level
- **Social Networking Analysis:** Netminer
- **Visualization tools:** Tableau
- **Experienced Applications:** MS Word, Excel, Powerpoint
- **Languages:** English (Working Proficiency), Korean (Native), Chinese (Intermediate), Lao (Basic)

MILITARY SERVICE

- **Sergeant** *2014 – 2016*
120 Battalion, 76 Brigade, 26th Mechanized Infantry Division
 - Telecommunication, Decodement, Language Interpretation between Republic of Korea and US army

PROFESSIONAL MEMBERSHIPS

- **Agricultural and Applied Economics Association (AAEA)**, Membership ID: 87612 *January 2025 - Present*
